

Instructions for setting up Echolink for the N7LXC-R

Download Echolink from <http://www.echolink.org/>

Start the program

Click on tools and then on setup

On the Station Tab (Default)

Do the setup

1: You will be a single user

2: Put in your call KD7RKP

3: Fill in a password (don't forget it) and check "Store Password locally"

4: Put in your name

5: Fill in your Location

6: Fill in your email

When done... click OK

7: Under Tools again

8: Click on Alarms

9: Click on Add New

10: Type in N7LXC-R

11: Click on OK

12: Under Tools again

13: Click on Preferences

14: On the List Tab "put a check in alarmed only"

Click OK

The program will now only show the N7LXC-R call. (makes it easy to find)

To try it out... and test it...

Double click on N7LXC-R (it should connect)

To talk, you hit the space bar just like you would to key the Mic

Talk into your Computer Mic

Give me a call... "N7NEW" and ID with your call

To listen hit the space bar again

If I'm in the shack and hear you I will answer just like I was using the radio.

Remember to use call signs just like normal because I have this end of Echolink tied to the Link System.

We don't have the radios hooked up at this time in Cle Elum so you won't be able to talk to anybody but me for testing. As soon as I get over to Cle Elum and get things hooked up there, You will be able to call anyone including your Dad from Echolink.

Don't be afraid to try this out as much as you need. This is the time to get the bugs out of the system. It is really not on the "Air" while we are testing this all

out. (transmitter is on a dummy load and doesn't get off my property)
If you have questions or run into trouble... Just give me a call on...
Home # 425-483-4133

and of course we always have email n7lxc@hotmail.com

Later, Mike "N7NEW"
